

CONSTRUCTION NOTICE

Superior Road Culvert Replacement at Knarston Creek

August 11th to September 19th, 2014

Please be aware that David Stalker Excavating Ltd. has been contracted by the District of Lantzville to perform works involved with the installation of a new concrete box culvert at Knarston Creek. In general the work will include installing 17.5 metres of concrete box culverts complete with headwalls within the existing flow channel of Knarston Creek directly under Superior Road.

To facilitate the installation works, Superior Road will be reduced to 24 hour single lane alternating traffic for approximately 10 to 12 days within the construction period. During this period and during working hours you will experience potential delays in passing through the work zone.

David Stalker Excavating Ltd. will strive to minimize disturbances during construction, however, certain disruptions will be unavoidable. We anticipate that there will be 2 days where a crane will be required to lift the new culvert sections into place. During these days delays may be longer than normal, we will post the crane working days in advance on the Project Notification Signs. Access to your homes will be maintained to the best of our ability.

Should you have any questions or concerns regarding this project we kindly ask that you direct all inquiries through the District of Lantzville.

Should you have any concerns regarding active construction activities, access within the construction project or for emergencies please contact David Stalker Excavating Ltd. at (250) 616-6675.

Your patience and understanding during this period is greatly appreciated.
