

NOTICE

Odour Complaints Thursday, May 7, 2026

Multiple complaints regarding a strong sewer odour on the north end of Lower Lantzville have been received by the District of Lantzville.

Island Health was notified and conducted site visits to the Lantzville area and the beaches and have confirmed that decomposing herring roe is most likely the source of the overwhelming odours in the area.

There is no indication of sewage contamination.

The District does not have any municipal sanitary sewers in the area.

Should you have any questions or require further information, please contact Island Health at 1-877-370-8699 or email info@islandhealth.ca.
