

WATER SERVICE SHUT OFF NOTICE

The District of Lantzville wishes to notify you that water service will be shut off for a period of approximately **8** hours, from **8:00am** to **4:00pm** on **May 4, 2026** while repairs to the water system are in progress.

Please ascertain that all automatic equipment, whether electrical or otherwise, is suitably protected for the shut down. For your own protection we suggest you shut off your electrical switch for the hot water tank, until water pressure is normal. You may notice a small amount of air in the line or discoloured water due to the disturbance of the water main. Running a tap for a few minutes will clear this. The District accepts no liability for damage resulting from interrupted service.

If you require further information, please contact the District at 250-390-4006

Date: May 1, 2026 Per: Chris Pinnington, Engineering Department
