

**NOTICE OF WATER SHUT OFF**  
**MONDAY, MAY 11, 2026**  
**8:00 AM to 4:00 PM**

---

In order to conduct some water system repairs, the District of Lantzville will be temporarily shutting off the water for a portion of lower Lantzville, which includes approximately 80 households. **The water shut off is expected to begin Monday, May 11, 2026, at 8am and is estimated to last until 4pm.**

All impacted properties should receive a hand-delivered notice advising of the water shut-off prior to Monday. To confirm whether your water access will be affected, you can also consult the map provided.

If your property will be impacted, it is recommended that you ensure you have sufficient water in containers for this period of time. You may also, during this period, wish to turn the power off to your hot water tank to protect the heating elements. When the water is turned back on, you may experience some initial discolouration in your water. This water is safe for use and should clear up within a few hours.

We understand the water shut off will be an inconvenience for many and will do our best to complete the watermain work within the above-mentioned timeline.

If you have questions about the shut off, you may contact Chris Pinnington, Civil Engineering Technologist/Project Manager at Lantzville Municipal Hall, 250-390-4006, or email him directly at [cpinnington@lantzville.ca](mailto:cpinnington@lantzville.ca).
